

Cover Letter – Rippling (SDE-I, Full Stack / Accounting Integrations)

Dear Hiring Team at Rippling,

I am writing to express my strong interest in the Full Stack Developer Intern / SDE-I position at Rippling. What excites me most about Rippling is its mission to unify HR, IT, and Finance into a single, seamless platform. The idea of managing the entire employee lifecycle—from onboarding to payroll to IT setup—in just 90 seconds is revolutionary, and I would be thrilled to contribute to this vision.

Over the past year, I have been actively building end-to-end applications using Django on the backend and React/Next.js on the frontend. These projects have not only sharpened my technical expertise in writing clean, maintainable, and scalable code but also taught me how to solve real-world business problems by integrating complex systems. In addition, I have been exploring AI-powered applications, including agents and chatbots, and have successfully integrated them into projects, further enhancing user experience and automation.

Your Accounting Integrations team's mission—to automate and synchronize financial data across platforms like NetSuite, QuickBooks, and Xero—resonates with me deeply. I am eager to bring my strong foundation in computer science, experience with full-stack development, and problem-solving mindset to contribute toward building reliable, scalable systems that make finance teams more strategic and less bogged down by manual processes.

Beyond my technical skills, I bring a proactive and curious approach, always eager to learn, improve, and collaborate with cross-functional teams. I believe in combining precision with creativity, which aligns perfectly with Rippling's culture of high impact, innovation, and continuous growth.

I would be honored if you could consider my application for this role. I am excited about the opportunity to learn from the exceptional engineers at Rippling while contributing my own expertise in Django, React, and AI-driven development.

Thank you for your time and consideration. I look forward to the possibility of contributing to Rippling's journey of redefining workforce management and accounting automation.

Warm regards,
Shubair
